

## Overview

Unlimited Innovations is a specialist in developing business software solutions for aerospace companies. We offer a set of business analysis modules and also provide Professional Services for custom software development.

### UI provides its clients with the unique combination of:

- A team of domain experts in aerospace business applications.
- A set of software modules developed specifically for the aerospace industry that allows us to quickly and affordably deliver high-quality business solutions.
- A large aerospace business user base and a large health care user base.
- Health care dashboards and provider and patient portals.

### Representative examples of completed work

- Supplier Management
- Subcontractor Management
- Program Management
- Mission Assurance
- Business Management Pipeline Development
- Supply Chain Optimization
- Executive Reporting
- Process Improvement
- Workflow Management
- Corporate Goals Tracking
- EDI Data Exchange for Health Care
- Health IT

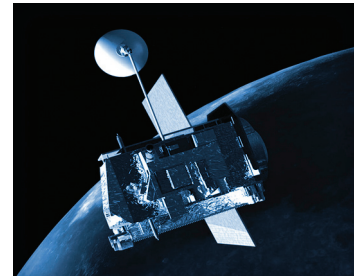

### Benefits

- **Rapid results** – Reusable software modules can be quickly modified to meet your specific requirements. Project schedules are often less than half the time of custom software projects.
- **Cost-effective** – The use of a core set of aerospace-specific software modules saves money compared to “start-from-scratch” efforts.
- **Customized to your needs** – Our modules are designed for customization to individual requirements; every project is a custom project.
- **High quality software** – Because our solutions use established software modules, you avoid the traditional “debugging” period of custom software.
- **“Quick Study” solution team** – Our experienced team of aerospace and health care business analysts and software developers won’t require training in the fundamentals of your business.

### Unique Software Design Capabilities

Aerospace business projects that benefit from our solutions:

- Combine information from separate database or software applications – We are expert in developing aerospace information systems that integrate information from different data repositories, providing information sharing and analysis across information silos.
- Complex data analysis – Our solutions can improve the speed and quality of analysis of very large quantities of data, replacing spreadsheets and multiple databases with a single, integrated solution.
- Automation of business processes – Applications that automate workflow based on predefined business rules can deliver large business efficiencies and ensure compliance with quality standards, such as AS9100.

**Microsoft**  
**GOLD CERTIFIED**  
 Partner

## Expertise by Work Breakdown Structure

### System Engineering

Management  
 System Analysis  
 System Requirements Analysis  
 HW Engineering and HW Requirement Spec  
 SW Engineering and SW Requirement Spec  
 Architecture Analysis / System Design  
 Interface Design  
 Operations Concept Definition

### Software Development

Management  
 Software Engineering  
 Process Design / Database Design  
 Design Analysis / Validation  
 Prototype / Demonstrations  
 COTS Software Procurement

### Development Tools Implementation

Preliminary Design  
 Detailed Design  
 Code and Unit Test  
 Integration

### Operations and Maintenance

Software Defect Correction  
 General Defect Correction  
 Software System Enhancements

### IT Managed Services

Software Database Services  
 Analysis  
 Design  
 Implementation  
 Test  
 Ongoing Support

### Headquarters

Anaheim, California

### Certifications

Small Business, Minority Owned Business (SB, MOB)  
 Microsoft Gold Certified Partner

### Awards

Northrop Grumman – Supplier Excellence Award 2008  
 Northrop Grumman – Supplier Excellence Award 2005  
 Microsoft Health care – User Group Award finalist 2008  
 Microsoft Health care – User Group Award winner 2006

### DUNS Number

061289471

### CAGE Code

35XN8

### NAICS Codes

541511 Custom Computer Programming Services  
 541512 Computer Systems Design Services  
 541513 Computer Facilities Management Services  
 541519 Other Computer Related Services  
 541611 Administrative Management and General Management Consulting  
 541614 Process, Physical Distribution, and Logistics Consulting Services

### Technology Expertise

Cloud Computing, Data Mining, Predictive Modeling, Business Intelligence, and Dashboards

BizTalk, .Net, SOA, Microsoft SQL Server, SharePoint

### Representative Projects and Subcontract Clients

Northrop Grumman

- Subcontractor Management System
- Cost Estimation and Risk Analysis platform

SAIC - Commercial Health Care

- Health Care Fusion
- Kaiser Permanente
- eHealth contracts
- BC Health data warehouse

Lockheed Martin

- Program Management Pattern Recognition
