

Overview

Today's healthcare environment is more complex than ever before. Custom software solutions are an effective part of your organization's competitive advantage. Unlimited Innovations' Healthcare Professional Services team offers a unique combination of strengths.

Superior Results, Superior Value

- **Healthcare Business Expertise** – Our business analysts and software developers are expert in healthcare business applications. Microsoft has twice recognized the company with its Healthcare Innovation Award. In addition to providing healthcare Professional Services, Unlimited Innovations develops and sells CERECONS, a Software as a Service (SaaS) healthcare product offering.
- **Quick-Start Healthcare Software Modules** – Our Professional Services clients benefit from a set of proprietary software modules we have developed for the healthcare industry. Using these modules as a base for custom development allows us to deliver software quickly and affordably.
- **Healthcare Data Interface Expertise** – Many healthcare applications and business processes require the import of data. Our technical team is highly qualified in providing bi-directional interfaces for standardized and proprietary data sources. Our expertise includes Electronic Data Interchange (EDI) interfaces such as CALINX and HL7 formats and also proprietary interfaces from GE (HealthCare Objects), EZ-CAP, Milliman, and others.
- **Client Experience** – Unlimited Innovation's Professional Services and healthcare product offering are widely used throughout the healthcare industry, with clients including health plans, MSOs, IPAs, physicians, case managers, and hospitals.
